### Education

- **Mapúa Malayan Colleges Laguna**  
2019-2023  
Bachelor of Computer Science  
(Cum Laude)
  - **Adventist University of the Philippines**  
2017-2019  
Science, Technology, Engineering,  
and Mathematics (STEM)
- 

### Skills

- React.JS, Next.JS, Node.JS
- CSS, HTML, JavaScript
- MySQL, MSSQL, Postgres SQL, Supabase
- Python, C#, C++, Java

### Projects

- **TaskList**  
A web application that allows user to create an account and create, edit, reorder, delete, and check tasks as completed. It was developed using React.JS, and Supabase.
  - **MeDetect: Counterfeit Over-the-Counter Medicine Detector**  
A web application that allows user to upload their medicine images to determine its authenticity using the object detection model trained using the YOLOv5 framework and was integrated within the website using Python Flask.
  - **DSA Visualizer**  
A web application that allows user to create an account and learn about Data Structures and Algorithms with the use of visualizers. They can participate in the provided discussion boards and quizzes. There is also an administrator panel for webmasters where they can view the site's statistics, manage users, manage comments, and create/manage quizzes. It was developed using React.JS, Node.JS, and MySQL.
  - **FoxTales Online Bookstore**  
A web application that allows user to create an account and shop at the website. There is also an administrator panel for webmasters where they can monitor the purchases, ship out books, and manage orders, users, etc. It was developed using the ASP.Net framework.
